Projects

[Portfolio Website](#)

- As a passionate web developer and designer, I recognized the need to establish a strong online presence to showcase my skills and projects.
- The task was to design a visually appealing portfolio website that highlight my proficiency in web development and design.
- I researched modern UIs and apply them wherever required in the project.
- The portfolio project makes it easy to showcase my UI designing and development skills in just a link.

Ninja-Ecommerce

- As a tech enthusiast, to gain hands-on experience, I decided to create a small-scale e-commerce platform.
- My task was to design and develop a functional e-commerce project from scratch, incorporating essential features like product listings, a shopping cart, and a secure checkout process.
- I began by researching e-commerce platforms like Amazon, and crafted a responsive website.
- The platform showcased my web development skills using latest technology, i.e., MERN stack.
